Hi

Put me on list for a subscription to Bally Board. Those ROM's have been worrying me in case replacement needed.

The Bally/TRS-80 interface sounds interesting. I have 48K TRS-80 so might be nice to have them communicate! Let me know details.

Have Heath H-14 Printer on order. It should work with Bally as it has selectable auto-carriage return - line feed option.

Please just note in ADS that I no longer have need for Bally enhancements.

Thanks

Vaughn Jupe
